

Latex Statement

SDM[®]27, Diluted Nitroglycerin USP (10% Nitroglycerin in Propylene Glycol)

Manufacturing Facility:

Copperhead Chemical Company Inc.
120 River Road, Tamaqua, PA 18252

Copperhead Chemical confirms that natural latex is not a component of SDM[®]27 (10% Nitroglycerin in Propylene Glycol), or of any of the ingredients which are employed in its manufacture.

The nitroglycerin component used for SDM[®]27 does, however, come into contact with a hose made from natural rubber during the manufacturing transfer process, although this material is not expected to be present in the final SDM[®]27 product.

Sincerely,

Dawn Clarke
Regulatory Affairs Manager
